

## Boyd Seals with Endura Tech

**All seals are not created equal.** Neither are all seal manufacturers. *Boyd heard your request for better looking seals, created a solution and, while we were working improvements for you, **took it a step further.***

The new benefit of a cleaner-looking surface with the added bonus of improved flex fatigue and abrasion resistance is great. Combine that with continued industry leadership in superior hot and cold weather performance and you get **Boyd Seals with Endura Tech** that *transportation OEM's and owners love.*

**Boyd brings you innovation.**

Boyd Corporation Global Headquarters 600 S. McClure Rd. Modesto, California 95357 +1 (209) 236-1111

*Boyd's patented RV seals solve water, dust and wind ingress problems for slide-out room environmental seals, bottom pans and wipers and accessories like serviceable D seals, corner moldings, screw covers and floor transitions.*

### **Benefits of Boyd Seals with Endura Tech**

#### ***Cleaner Surface***

Traditional matte or gloss finishes attract and reveal manufacturing dust and debris from assembly operations. Boyd Seals with Endura Tech have a surface texture that conceal this debris. This texture is also resistant to light abrasions and typical wear-and-tear that occur during storage, handling and installation operations.

#### ***Improved Abrasion Resistance***

Minimal material loss after 120,000 cycles.

#### ***Continued Superior Hot and Cold Weather Performance***

Excellent compression set performance in accelerated aging simulations at extreme temperatures.
