

Product Change Notification

PCN Publish Date: July 5, 2012
PCN #: PCN062912
Change Title: Pre-black anodized product replaced with fully anodized product

Products Affected: See Appendix A

Description of the Change: We are unable to offer pre-plated (black anodized) stamped product. We will now offer same stamping entirely anodized after the stamping process. We will be using existing tooling and equipment for the fully anodized product as we used for the pre-black anodized product. The only difference will be that the new offering will not have the raw (un-anodized) edges that our "PB" (pre-black) product had, otherwise form-fit-function, the parts are identical.

Scheduling of Change:

Sample Date: Sample and production availability will be 6-8 weeks from approval date.

Volume Production: This change will allow us to use raw coil which has a much shorter lead time vs. pre-black anodized coil

EOL of pre-black product: Immediately

Customer Impact: This is a part number and appearance change. Please update your internal documentation to reflect the change from "PB" suffix to "B" suffix and amend all purchase orders with Aavid-Thermalloy to reflect the new part number. In some cases, we may still have the ability to produce one last lot of the pre-black anodized product; contact your customer service representative for details.

Qualification Results:

Contact Information: For questions please contact Aavid Thermalloy Technical Support at your local sales office.
